**CA-KNF-005956**

**P5JB1F-0505**

## **24 HOUR INCIDENT ACTION PLAN**

### **DAY / NIGHT SHIFT**

**AUGUST 28, 2014 0600 - 1800**

**AUGUST 28-29, 2014 1800-0600**

## ICS Form 202

<b>INCIDENT OBJECTIVES</b>	<b>1. INCIDENT NAME</b> <b>HAPPY CAMP COMPLEX</b> <b>CA-KNF-005956</b>	<b>2. DATE</b> 08-27-14	<b>3. TIME</b> 1254									
<b>4. OPERATIONAL PERIOD (DATE/TIME)</b> August 28-29, 2014 DAY/NIGHT 0600 - 0600												
<b>5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)</b>  <p>Firefighter and public safety is our core value. All identified hazards will be mitigated or avoided.</p> <p><b>MANAGEMENT OBJECTIVES:</b></p> <p>Manage costs commensurate with values at risk.</p> <p>Minimize damage to natural and cultural resources caused by fire suppression actions.</p> <p>Maintain the current communication strategy to inform the public, cooperators, and key stakeholders on current fire status and planned actions.</p> <p><b>CONTROL OBJECTIVES:</b></p> <p>Use MIST to minimize impacts to wilderness characteristics</p> <p>Provide structure defense resources for the communities of Elk Creek, Curly Jack, Happy Camp, Fort Goff, China Grade, Thompson Creek, Seiad, Hamburg, and Scott Bar. Provide support for protecting private property and infrastructure.</p> <p>Manage and coordinate all new fires within Zone 1 and Zone 2, defined by the TFR.</p> <p>Manage all fires under a full suppression strategy.</p>												
<b>6. WEATHER FORECAST FOR OPERATIONAL PERIOD</b> See attached Weather Forecast.												
<b>7. GENERAL SAFETY MESSAGE</b> LCES; Roads are sandy, be careful not to get stuck.

## Happy Camp Complex Weather Forecast

FORECAST NO: 15 D/N  
PREDICTION FOR: Thursday Day/Night Shift  
SHIFT DATE: August 28, 2014  
FORECAST ISSUED: 1900 August 27, 2014

NAME OF FIRE: Happy Camp Complex  
UNIT: KNF / SoCal 3  
Incident Meteorologist: Jeff Tonkin

....GUSTY WEST WINDS...LOW RH AND STRONGER INSTABILITY TODAY....

**WEATHER DISCUSSION:** Stronger west winds are expected today along upper slopes and ridges. In addition to the gusty winds...the airmass will be slightly more unstable this afternoon while remaining very dry at all levels. The gustier wind pattern is expected to persist through Saturday as the pressure gradient intensifies each afternoon over the region. Some relief in the hot temperatures and very dry conditions is expected to begin on Friday...however winds will remain gusty.

### WEATHER FORECAST FOR TODAY (THURSDAY DAY SHIFT):

**WEATHER:** Clear but with periods of heavy Smoke....some mixing after 1700.

**MAX TEMPERATURES:** **With Smoke:** Valleys (1,200 ft) 86 – 93 F, Ridges (4,000 ft) 81 – 86 F

**No Smoke:** Valleys (1,200 ft) 92 – 97 F, Ridges (4,000 ft) 83 – 87 F

**MIN HUMIDITY:** **With Smoke:** Valleys (1,200 ft) 17 – 21%, Ridges (4,000 ft) 21 – 25%

**No Smoke:** Valleys (1,200 ft) 13 – 18%, Ridges (4,000 ft) 17 – 22%

**WINDS (EYE LEVEL):**

Lower Slopes / Drainages – West or Up slope / up canyon 3 – 5 mph...Gusts 6-10 mph.

Ridges – West and Southwest 3 – 5 mph until 1100 PDT...then increasing to 7 to 11 mph

With gusts to 16 to 22 mph through 2200 PDT.

**LAL:** 1 **CWR:** 0% **HAINES:** 4-5

**STABILITY / INVERSION:** Multiple Inversions lifting between 1400 and 1600 PDT.

**SMOKE TRANSPORT:** West 10-15 mph.

### WEATHER FORECAST FOR TONIGHT (THURSDAY NIGHT SHIFT):

**WEATHER:** Mostly clear but with abundant smoke.

**MIN TEMPERATURES:** 54 – 58 F

**MAX HUMIDITY:** Valleys (1,200 ft) 77 – 82%F, Ridges (4,000 ft) 70 – 75%

**WINDS (EYE LEVEL):** Valleys – West or Downslope / down valley 1 – 3 mph

Ridges – West Northwest 5 – 8 mph...Gusts to 10 mph...diminishing late.

**LAL:** 1 **CWR:** 0% **HAINES:** 3-4

**STABILITY / INVERSION:** Multiple Inversions lifting between 1500 and 1700 PDT.

**SMOKE TRANSPORT:** West 5-10 mph.

**OUTLOOK FOR FRIDAY (4500 FT):** Partly Cloudy with abundant smoke. Max Temps: 80 to 84. Min RH: 24 - 28%. Ridge Wind: West and Southwest 6 – 10 mph gusts 12 – 16 mph. LAL 1. CWR 0%. Haines 3-4.

### THREE DAY EXTENDED DAYTIME (SATURDAY – MONDAY 4500 FT)

	<u>Max T</u>	<u>Min RH</u>	<u>Max RH</u>	<u>Ridge Winds</u>	<u>LAL</u>	<u>WX</u>
SAT	73 – 77	30%	80%	W/SW 5 - 8 G 15 mph	1	SMK
SUN	75 – 79	32%	80%	W/NW 4 - 6 G 10 mph	1	SMK
MON	78 – 83	28%	80%	E 2 – 4	1	SMK

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER: 024</b>	<b>TYPE OF FIRE: Wildfire</b>
<b>FIRE NAME: Happy Camp Complex</b>	<b>OPERATIONAL PERIOD: 8/28/14 0600 to 8/29/14 0600</b>
<b>DATE ISSUED: 8/27/14</b>	<b>TIME ISSUED: 2000 hrs</b>
<b>UNIT: Klamath National Forest</b>	<b>SIGNED: FBAN,</b> 

### INPUTS

**WEATHER SUMMARY:**      **See Weather Forecast for specific information**

Sky: Mostly Smokey...Clearing in the afternoon ... Temps Max 92° Min 55°...RH Min 20% Max 75%

Daytime Winds...Valley: up slope/up valley 3-5 mph...Ridge: W 6-10 mph G 12-18

Nighttime Winds...Valley: down slope/valley W 1-3mph...Ridge: 3-6 mph G 8-10

LAL 1... Haines 4-5...Inversion lifting between 1300-1400, setting back in at midnight

**Fuels:** Fuels burning consist of Timber Understory and Timber Litter(FM 9,10).

A fuels & fire behavior is in affect for the Region. Live Fuel Moisture is estimated at 90%. 1000 hr. fuels are 8%.

### OUTPUTS

**GENERAL FIRE BEHAVIOR:**

The Fire's main influences have been critically dry fuels and steep topography. Unstable atmospheres have allowed quick column development and increased spotting distances. Tomorrow will be an unstable and breezy day.

**Local threshold for large growth:** 20' winds over 4 mph, RH less than 40%, Temps over 75\*, 1000 hr FM less than 13% (refer to Pocket Card in IAP).

Spotting potential is high during the peak burn period 1500-2000(PIG >85%) and low for night operations (PIG <20%)

### SPECIFIC

**All Divisions:**

The potential for single/group tree torching and mid-range spotting will remain a threat due to ladder fuels. Roll-out of burning material remains a high concern and is a main factor in fire growth.

**Frying Pan Fire:** West winds will affect the fire are today. When the inversion breaks, expect spread activity to increase. Instability will support rapid fire growth an large column development.

**Div. L:** In areas where fire reaches the bottom of Grider Creek, the creek is not likely to stop progression. Surface fire will be high intensity and persistent. If fire becomes established on the eastern side of the creek, fire activity will change quickly. In areas where slope and wind align, expect short crown runs and spotting.

**Div. F:** Unburned pockets within containment lines will continue to burnout.

**Div. T:** Rolling materials and snags will pose a threat for the next several days.

**Div. O:** Fuels within the Doolittle drainage will continue to burnout. Pay attention to the upper end of the division, near the Div I break.

**Falkstein Fire:** Fire is well established east of the indirect dozerline and is expected to threaten Scott River Rd. By 1400, expect short duration crown runs in areas with continuous fuels aligned with wind and slope. Under the inversion expect high intensity burning in dead and down fuels with slow rates of spread. Spotting will be mid-range from torching and rollout.

**AIR OPERATIONS:**

Good flying conditions once the inversion breaks. Wind will help improve visibility earlier in the day.

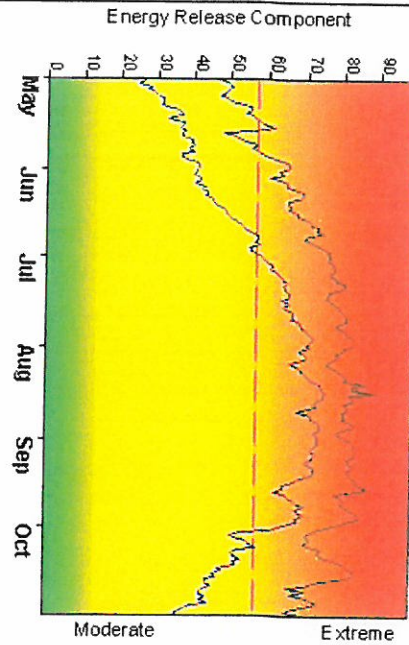

### SAFETY

Winds add to the process of bringing down fire weakened trees. Pay attention to this hazard in areas of mop-up.

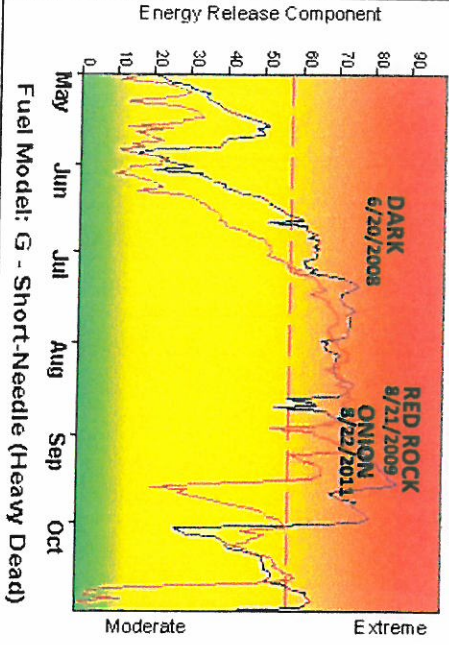

# FIRE DANGER -- West Side KNF

Maximum, Average, and 43th Percentile, based on 12 years data

# Years to Remember: 2008 2010

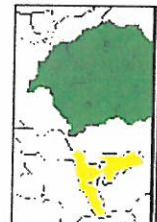

## Fire Danger Area:

- ◆ 200, 202, 204, 208
- ◆ CA200 & CA281
- ◆ See below
- \* Meets NWCG Wix Station Standards

## Fire Danger Interpretation:

EXTREME -- Use extreme caution  
 CAUTION -- Watch for change  
 MODERATE -- Lower Potential, but always be aware

Maximum -- Highest Energy Release Component by day for 2000 - 2011

Average -- shows peak fire season over 12 years (2204 observations)  
 43th Percentile -- Only 43% of the 2204 days from 2000 - 2011 had an Energy Release Component below 57

## Local Thresholds - Watch out:

Combinations of any of these factors can greatly increase fire behavior:  
 20' Wind Speed over 4 mph, RH less than 40%,  
 Temperature over 75, 1000-Hour Fuel Moisture less than 13

## Remember what Fire Danger tells you:

- ✓ Energy Release Component gives seasonal trends calculated from 2 pm temperature, humidity, daily temperature & th ranges, and precip duration.
- ✓ Wind is NOT part of ERC calculation.
- ✓ Watch local conditions and variations across the landscape -- Fuel, Weather, Topography.
- ✓ Listen to weather forecasts -- especially W/IND.

## Past Experience:

Large fires (> 50ac) occur more frequently when BI exceed 58. Fires 50 acres and larger can readily increase in complexity  
 Multiple lightning ignitions can overwhelm suppression resources. 2008 was an active fire year. 2010 was quiet.

Sawyers Bar, Somes Bar, Slater Butte, Blue Ridge, Oak Knoll, Slater Butte, Collins Baldy, Quartz Hill, Callahan #2, and Dutch-Indy RAO's data was used.

Responsible Agency: Klamath National Forest  
 FF+4? Beta 11/08/2012-13:38 (F+KWF\_pend of record\_v25jun12)

<b>7. Control Operations: *All personnel must review Hazard Tree Safety IRPG pg. 22 during division breakouts and tail gate briefings.</b> Prepare line for holding along the D/F to F/H break. Tactical ignitions as directed and approved by OBD and OSC. When firing, head fire should be considered only when life or property are threatened. All divisions refer to M.A.P.s. (Management Action Points) Mop up to the degree necessary to make the likelihood of escape very low; based on experience, terrain, fuel types and fuel conditions, and current and predicted weather conditions.							
<b>8. Special Instructions</b> Do not use non metered hydrants <b>Ensure all crews have been briefed prior to traveling to their work assignment about the naturally occurring asbestos job hazard analysis.</b> <b>SOFR will notify DIVS when entering Division and exiting.</b> <b>FOBS and READ will notify DIVS when entering Division and exiting.</b>

## AIR OPERATIONS SUMMARY

PREPARED BY: Billy Monahan

PREPARED DATE/TIME: 08/27/14

1. INCIDENT NAME: Happy Camp Complex

2. OPERATIONAL PERIOD DATE: 08/28/14

START TIME: 0700 END TIME: 1930 SUNRISE:0634 SUNSET:1956

## 3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.)

Thunderstorms, erratic winds. Low wires and cables  
Numerous aircraft in confined areas. MTR's & MOA's near fire area.

Flight following procedures at Cave Helibase will be done with Cave Tower, 125.725

Track all retardant usage, location & gallons.

Helispots: H-1 41 38.84 123 13.423 H-41 37.756 123 12.460

Note: Cave Helibase at Illinois Valley airport now has a Temporary Tower, "Cave Tower" 125.725

## 4. MEDEVAC AC:

408 (NVG, ALS,  
Hoist) @ Scott  
Valley,

503 litter capable

at Happy

510 litter capable at  
Cave

	Seiad MRB 41 50.035 x 123 11.708			

*Hazards we face:*

- Appropriate tree falling
- Travel on roads/speed/dust
- De-Hydration
- Working around stock
- Vehicles in camp
- Sleeping areas/placement of tents
- Proper use of radio channels

*Some possible mitigations could include:*

- Only fall trees that are HAZARDS... (risk vs. gain) no sports falling.
- Scott's River Road to Happy Camp is seeing heavy traffic, use headlamps, be aware of blind turns, 1 lane in a few spots and watch speed. Traffic control is set up between DP 12 and 13. Interior roads are becoming dusty watch spacing between vehicles.
- De-hydration is an on-going issue, others fires are having serious issues. Drink lots Gatorade and followed by a water chaser. Drink up....it's free!!
- When encountering pack animals; make eye contact with packer, follow directions. Stand on downhill side; stop working until pack train has passed. Don't touch the animals!
- In base camp follow road direction signs, stay on roads, park adjacent to roads.
- Place tents in designated sleeping areas. No sleeping along main camp road nor between main camp road and perimeter road.
- Use only assigned radio channels. Channels assigned to air are NOT to be used for tactical operations, day or night.

Happy Camp Complex Safety Officers: Doug Elliott & Bob Moore

To expedite processing, please avoid waiting until the day of demob to process a claim.

### CACHE ITEM CLAIMS

Individuals responsible for or assigned government property are responsible to document loss or damage on the Property Loss or Damage Report, OF-289. The individual, supervisor and a witness must document facts and circumstances on the form in order to gain approval to repair or replace damaged property.

The Supply Unit Leader (SPUL) or Incident Agency Representative approves replacement requests for expendable cache items. If this equipment or supply is not available at the incident AND the requesting resource is being demobilized, an OF-315 Incident Replacement Requisition is completed and signed by the SPUL. An "S" number will be assigned by the incident to be used by the home unit.

### NON CACHE ITEM CLAIMS

All non-cache items available through the cache (e.g. sleeping bags, tents, tools, sleeping pads) will be replaced with cache equivalent items. Replacement for normal wear and tear is through home unit project funds. Specialized equipment (non-cache and non-expendable) shall be documented on a resource order and must be appropriate to the incident position. For replacement with incident funds, the item must have been clearly damaged or destroyed on the incident.

The OF-289 will be used to request consideration for replacement or repair of these items. Once approved, the OF-289 will be used by the incident to issue an "S" number to be used by the home unit.

### CLAIMS PROCESSING

The incident agency will review all potential claims for accuracy and completeness and forward to the appropriate adjudicating official. This includes forwarding employee claims to the employee's home unit, if different than the incident agency.

## Human Resource Message

### Bias for Action

"Most of us made a commitment to serve our communities, our states, or our nation. We willingly accepted this obligation to place ourselves at risk and to put the interests of others before our own. Leaders in the wildland fire service are not only empowered but also duty-bound to act on a situation that is within our power to affect, even without direction from above.

"Fire leaders use judgment, act within the intent of their leaders, work in unison with others, develop and communicate a plan and then inform leaders of actions as soon as safely possible. Leaders accept responsibility, not only for their own actions, but for those of their team.

"Our employees also have responsibilities: to become competent in basic job skills; to take the initiative and learn from others; to ask questions and develop their communication skills."

*-From the NWCG publication, "Leading in the Wildland Fire Service"*

Let's put these principles to use as we continue our assignment. Hold yourselves and your crews accountable, hold to the principles of leadership and help insure we are complying with the conduct expectations for this incident. Deal with issues that arise and be straightforward in dealing with noncompliance of agency and incident conduct expectations.

## CODE OF CONDUCT INCIDENT PERSONNEL

Each individual on this incident is responsible for:

- Being *ready and able* to perform their assigned duties effectively
- Conducting themselves in a manner that treats people with dignity, equity, courtesy, and respect
- Abiding by agency ethics and conduct regulations
- Reporting any harassment or other inappropriate behavior

Each individual on this incident has the right to:

- Work in an environment characterized by safe work practices
- Work in a fair and harassment free environment
- Say "No" to unwelcome advances or requests for favors
- File complaints or grievances through appropriate avenues

There is zero tolerance for inappropriate behavior while assigned to the incident, including

- Illegal drug use
- Alcohol use
- Unsafe work practices and activities
- Discrimination
- Sexual harassment
- Fighting, threatening and abusive behaviors
- Using social media and electronic communication devices for personal business while engaged in fire assignment duties
- Other violations of USDA and Forest Service standards of conduct

Failure to adhere to the Code of Conduct could result in dismissal from the incident, with notification to your home unit.

The public expects our best efforts; they see us as professionals in what we say and do. Let's continue to show them we are!

# ATTENTION FEDERAL TRAINEE'S

**Are you going to be recommended for certification on this incident?**

**Or**

**Have you already been recommended for certification but still have your taskbook with you at this incident?**

Your FQRC needs your taskbook with all the proper documentation so they can review it and submit it to the certifying official.

**September 5** is the deadline for submitting applications to the R5 Fall Fire Hire

If you have worked hard all summer for an incident qualification that will get you to that next level, don't wait and miss your opportunity.

**Come by and see me and I will get your completed taskbook back to your FQRC.**

# Incident Trainee / Trainer Data Worksheet
